

FOR IMMEDIATE RELEASE

## LAN AIRLINES MONTHLY STATISTICS REPORT FOR MARCH 2006

---

Santiago, Chile, April 11, 2006 – LAN Airlines S.A. and its related companies, (“LAN” or “the Company”) (NYSE: LFL / IPSA: LAN), one of the leading airline groups in Latin America, reported its preliminary monthly and accumulated traffic statistics and punctuality indicators for March 2006.

System passenger traffic for March increased 1.3% as capacity rose 6.4%. As a result, the Company’s load factor decreased 3.7 point to 72.9%. International passenger traffic accounted for approximately 86% of total passenger traffic.

International passenger traffic for March rose 1.8% as capacity increased 6.1%. Accordingly, the international passenger load factor for the month decreased 3.2 points to 75.2%. Long-haul capacity grew as an increase in operations to Europe and the South Pacific was partially offset by a reduction in flights to the United States and the Caribbean. Short-haul capacity grew mainly due to expansion in regional operations and in the Argentine domestic market. Load factor was also impacted by the strong comparison base caused by the Easter holiday falling in March 2005.

Domestic passenger traffic in Chile decreased 1.3% as capacity increased 8.0%. As a consequence, the domestic load factor for the month decreased 5.8 points to 61.3%. Domestic load factor decreased due to schedule adjustments and the absence of the Easter holiday in March 2006.

Cargo traffic increased 17.1% as capacity rose 18.5%. As a consequence, load-factors decreased 0.8 points to 65.6%. Cargo traffic grew significantly as strong import volumes were complemented by a strong performance in northbound operations associated with the peak season for specific perishable products.

In March, 89.7% of the Company’s total flights left on time, based on a fifteen-minute standard (all departures leaving within fifteen minutes of scheduled departure time are considered as “on-time”). This represented a 2.5-point increase compared to same month of 2005.
