

FOR IMMEDIATE RELEASE

## LAN AIRLINES MONTHLY STATISTICS REPORT FOR JUNE 2006

---

Santiago, Chile, July 10, 2006 – LAN Airlines S.A. and its related companies, (“LAN” or “the Company”) (NYSE: LFL / IPSA: LAN), one of the leading airline groups in Latin America, reported its preliminary monthly and accumulated traffic statistics and punctuality indicators for June 2006.

System passenger traffic for June increased 6.4% as capacity rose 8.2%. As a result, the Company’s load factor decreased 1.2 points to 68.6%. International passenger traffic accounted for approximately 89% of total passenger traffic.

International passenger traffic for June rose 6.6% as capacity increased 8.5%. Accordingly, the international passenger load factor for the month decreased 1.2 points to 70.2%. Long-haul capacity grew as an increase in operations to the South Pacific and Europe was partially offset by a reduction in operations to the United States and the Caribbean. Short-haul capacity grew mainly as a result of an expansion in regional operations and in the Argentine domestic market.

Domestic passenger traffic in Chile increased 4.3% as capacity rose 6.0%. As a consequence, the domestic load factor for the month decreased 1.0 points to 58.1%.

Cargo traffic increased 8.9% as capacity rose 6.7%. As a consequence, load-factor increased 1.4 points to 67.1%. Cargo traffic grew mainly as the expansion of imports into the region was partially offset by the continued weakness of other exports out of Chile and Brazil.

In June, 88.5% of the Company’s total flights left on time, based on a fifteen-minute standard (all departures leaving within fifteen minutes of the scheduled departure time are considered as “on-time”). This represented a 6.9 point increase compared to same month of 2005.
