During June, international capacity was mainly driven by an increase in operations on routes to Europe, the United States, as well as certain Regional routes.

This increase was mainly due to the recovery in imports to Latin America driven by Brazil and the increase in operations to Europe with the B777-200 freighter fleet. In-line with higher demand, capacity grew 29.7%. As a result, the cargo load factor rose 2.5 points to 68.8%.

During June, 86.1% of the Company’s total flights left on time based on a fifteen-minute standard (all departures leaving within fifteen minutes of the scheduled departure time are considered as “on-time”). This represented a decrease of 6.4 points compared to June 2009.
